Here is the updated and fully structured script for your 27-slide presentation, based precisely on the newly uploaded document. The content is distributed evenly among your 6 group members (4 slides each) and includes the introductory and concluding slides.

Slide 1: Welcome Slide

- **Topic:** A Case Study of Bashundhara Group
- **Course Title:** Industrial and Operational Management
- **Course Code:** GED-405
- **Section:** 222 D1
- **Submitted to:** Mashroor Mushtaque
- **Submitted by:**
    - Sagor Ahmed (222902022)
    - Rakesh Chandra Barman (222902030)
    - Riyadh Uddin Nayeem (222902034)
    - Sadman Ahmed Sakin (222902049)
    - Niti Bhuiyan (222902015)
    - Shifa Sarkar (222902082)

Slide 2: Table of Contents

- Introduction of the Organization
- Mission, Vision, and Management Activities
- Resources Utilized by the Organization
- Organizational Hierarchy and Management Structure
- Employee Motivation in the Organization
- Conclusion & Recommendation

Presenter 1 Content: Introduction & Core Statements

Slide 3: History and Background

- **Origins:** Bashundhara Group started in 1987 as East West Property Development Ltd (EWPD).
- **Initial Goal:** The primary focus was solving housing problems in Dhaka by creating planned residential areas.
- **First Major Success:** The Bashundhara Residential Area became a landmark success, known as one of the most well-planned areas in the city.
- **Rapid Expansion:** Driven by real estate success, the group rapidly invested in manufacturing and trading in less than a decade.

Slide 4: Growth and Diversification

- **Early 1990s:** The group established diverse enterprises producing cement, paper and pulp, and tissue paper.
- **Media Expansion:** In 2009, they established "East West Media Group Ltd," which owns top dailies like "Kaler Kantho" and "Bangladesh Pratidin".
- **Current Scale:** By 2026, Bashundhara is a massive conglomerate with over 50 business units.
- **Economic Impact:** The group plays a significant role in Bangladesh's economy across energy, media, sports, and heavy industry sectors.

Slide 5: Products and Services Portfolio

- **Real Estate:** Offers premium, secure, and planned housing solutions, alongside commercial complexes like Bashundhara City Mall.
- **Paper Sector:** Established market leadership in providing essential hygiene products (tissue) and industrial packaging.
- **Media & Sports:** Operates highest-circulated newspapers and reshapes local sports through Bashundhara Kings and T Sports.
- **CSR Activities:** The Bashundhara Foundation drives philanthropic services for underprivileged communities and special needs children.

Slide 6: Mission, Vision, and Values

- **The Vision:** To be the largest business house in the country and the biggest private-sector contributor to economic and social development.
- **The Mission:** Adopted the core theme of "For the People, For the Country".
- **Beyond Profit:** The organization acts as a social partner, ensuring every new project contributes to national development.
- **Core Values:** Decision-making is based on patriotism, honesty, fair practice, and service to the nation.

Presenter 2 Content: Planning & Organizing

Slide 7: Planning - Setting the Strategic Roadmap

- **Strategic Intent:** The group's core theme acts as a moral compass for every strategic management decision.
- **Top-Down Vision:** Planning is a top-down process aligned with the goal of becoming a "Future-Ready Conglomerate".
- **Nation Building:** Goals are set based on contributing to the country, such as establishing Bangladesh's first gold refinery to formalize the sector and prevent capital flight.

- **Financial Benchmarks:** Projects maintain economic sustainability by targeting specific benchmarks like a 15% Return on Investment (ROI).

Slide 8: Strategy and Types of Plans

- **SWOT-Based Strategy:** Rigorous analysis helps identify market gaps.
- **Import Substitution:** After identifying that 90% of bitumen was imported, the group built a Bitumen Plant to serve the country's needs.
- **Single-Use Plans:** Massive, non-recurring projects like the Bashundhara Gold Refinery require specialized blueprints and unique regulatory approvals.
- **Standing Plans:** The group uses continuous Standard Operating Procedures (SOPs) for safety across all factories and strict HR recruitment policies.

Slide 9: Organizing - Departmentalization & Specialization

- **Structural Approach:** The group uses Product and Functional Departmentalization to manage its vast human and physical capital.
- **Strategic Business Units (SBUs):** Major concerns operate as individual SBUs with dedicated resources, supported by centralized IT and HR.
- **Job Simplification:** Used in manufacturing units, such as Tissue or LPG, to maintain high-speed production and quality control.
- **Job Enlargement:** Utilized for specialized experts, like refinery engineers, to keep them engaged in complex projects.

Slide 10: Organizing - Resource Centralization

- **CapEx Centralization:** Vital decisions, like massive capital expenditures for new factories, are highly centralized under the Chairman.
- **Maintaining Alignment:** This centralization ensures that expansions remain strictly aligned with the long-term vision of the company.
- **Decentralized Sales:** Sales teams are region-specific and decentralized to aggressively penetrate local markets.
- **Vertical Supply Chain:** Organized as an integrated unit, owning shipping fleets and trucks to ensure materials reach factories without third-party delays.

Presenter 3 Content: Leading & Controlling

Slide 11: Leading - Visionary Guidance

- **Scale of Leadership:** The organization demands a leadership style capable of managing over 50,000 employees.
- **Transformational Style:** The Chairman and top leadership utilize a visionary, transformational approach.
- **Patriotic Motivation:** Leaders inspire the workforce by framing daily operations as a contribution to "Bangladeshi pride" rather than just a job.

- **Communication Flow:** Directives primarily cascade top-down, flowing formally from the board to field staff via General Managers.

Slide 12: Leading - Culture and Inclusion

- **Focus on Empathy:** Recent leadership trends heavily emphasize empathy and inclusion across the organization.
- **Women in Leadership:** The group is actively increasing the participation of women in high-level management within the Paper and Real Estate sectors.
- **Alignment Meetings:** Momentum is maintained through rigorous weekly SBU alignment meetings.
- **Town Halls:** Top management hosts large-scale events and interactive huddles to keep operational goals aligned with the national mission.

Slide 13: Controlling - Technological Oversight

- **Data-Driven Mechanisms:** Controlling is highly technological to ensure massive outputs meet international standards.
- **ERP Integration:** Advanced SAP and MIS allow top management in Dhaka to monitor real-time production data from distant factories.
- **Strict Quality Control (QC):** The group implements strict ISO 9001:2015 certifications across its manufacturing plants.
- **Automated Halts:** If a batch fails to meet the "Bashundhara Standard," the controlling mechanism triggers an immediate production halt.

Slide 14: Controlling - Performance & Financial Alignment

- **Performance Appraisals:** Employees are evaluated using a 6-step Performance Management Process to ensure alignment with "Strategic Growth" goals.
- **Financial Control:** Health is monitored via strict budget variance analyses run through the central SAP system.
- **Market Tracking:** The group constantly tracks market share metrics to adjust product pricing and production volumes dynamically.
- **Operational Efficiency:** Plant managers use daily KPI tracking and Six Sigma principles to minimize waste in heavy industries.

Presenter 4 Content: Organizational Resources

Slide 15: Human Resources (Human Capital)

- **Massive Employer:** Bashundhara provides livelihoods for over 50,000 direct employees and nearly 500,000 indirect workers.
- **Technical Expertise:** The group employs a vast array of specialized professionals, including chemical engineers and world-class journalists.

- **Leadership Pipeline:** Recruits fresh graduates from top-tier universities for Management Trainee Programs (MTP).
- **Safety Standards:** Maintains a structured workforce with a strong focus on occupational health and safety (OHS) in manufacturing units.

Slide 16: Financial Resources (Capital & Revenue)

- **Mega Project Capacity:** Immense financial strength allows the execution of large-scale projects that competitors cannot manage.
- **Balanced Cash Flow:** Operating in both fast-moving consumer goods (FMCG) and Heavy Industry protects against sector-specific economic downturns.
- **High Creditworthiness:** The group secures multi-billion Taka loans from both local and international financiers.
- **Internal Funding:** Expansions are heavily funded by retained earnings from their highly successful real estate and paper divisions.

Slide 17: Physical Resources (Infrastructure)

- **Industrial Parks:** Owns massive industrial zones, such as the Bashundhara Industrial Park, housing state-of-the-art factories.
- **Advanced Technology:** Utilizes premium German and Italian machinery to match global production efficiency standards.
- **Logistics Network:** Owns a private shipping fleet and hundreds of delivery trucks, reducing reliance on third-party logistics.
- **Iconic Landmarks:** Possesses major physical assets like Bashundhara City Mall and the FIFA-standard Bashundhara Kings Arena.

Slide 18: Information Resources & Integration

- **SAP ERP System:** Integrates all business functions across 50+ units, providing top management with "Single-Source-of-Truth" data.
- **Market Intelligence:** The group's media wing provides a unique advantage in understanding public sentiment and tailoring marketing strategies.
- **Knowledge Archives:** Maintains extensive proprietary data, including geological surveys and chemical formulas.
- **Vertical Integration:** Owning everything from raw material ships to retail malls creates exceptional resource efficiency.

Presenter 5 Content: Hierarchy & Structure

Slide 19: Organizational Hierarchy Structure

- **Tall Structure:** The group operates under a traditional hierarchy with multiple layers of management.

- **Centralized Decision-Making:** Designed to maintain strict control over 50+ diverse business units.
- **Clear Chain of Command:** Every employee knows exactly who to report to, which heavily reduces role ambiguity.
- **Brand Consistency:** Ensures all companies adhere strictly to the "Bashundhara Brand" standards and values.

Slide 20: Top-Level Management

- **The "Brains":** Includes the Chairman, Managing Director, and Vice Chairmen.
- **Strategic Focus:** Responsible for long-term strategic planning and institutional growth.
- **High-Level Authorization:** They authorize massive investments, such as building South Asia's largest Bitumen plant.
- **Ultimate Authority:** Top management holds the final say over capital allocation and overarching brand direction.

Slide 21: Middle and First-Line Management

- **The "Bridge":** Middle managers (Executive Directors, GMs) translate broad visions into operational goals and coordinate departments.
- **Campaign Logistics:** If top management demands higher market share, middle management develops the specific campaigns and distribution logic.
- **The "Front Lines":** First-Line Managers (Site Supervisors, Floor Managers) oversee the daily factory and site operations.
- **Daily Accountability:** They schedule shifts, ensure shop-floor safety, and are directly accountable for daily production quotas.

Slide 22: Communication Flow and Structural Evaluation

- **Vertical Communication:** Directives and policies flow Top-Down, while performance feedback flows Bottom-Up.
- **Horizontal Tech Bridge:** SAP systems allow departments to communicate data instantly, bypassing middle layers.
- **Efficiency Strengths:** The structure offers high discipline, a clear chain of command, and close supervision.
- **Bureaucratic Weakness:** Because vital decisions require top approval, responding to sudden market changes can be slow.

Presenter 6 Content: Motivation & Recommendations

Slide 23: Employee Motivation Overview

- **Tiered Strategy:** Uses a blend of Extrinsic Rewards (benefits) and Intrinsic Motivators (culture) to address varying job levels.

- **Competitive Pay:** Maintains highly competitive salary brackets ranging from entry-level to experienced management.
- **Financial Incentives:** Provides two festival bonuses annually and incentive-based pay in sales and manufacturing.
- **Welfare Perks:** Offers provident funds, housing allowances, and subsidized healthcare via the Bashundhara Foundation.

Slide 24: Motivation Culture & Theories

- **Nationalistic Identity:** The "For the People, For the Country" motto instills a profound sense of purpose, serving as a unique motivator.
- **Maslow's Hierarchy:** Satisfies physiological needs with pay, and addresses Self-Actualization through "Nation Building" projects.
- **Herzberg's Theory:** Safe environments and salaries act as Hygiene Factors, while career growth and recognition act as Motivators.
- **Vroom's Expectancy Theory:** Prominent in sales, where employees have clear expectations linking effort to targeted bonuses.

Slide 25: Summary of Key Insights

- **Visionary Transition:** The group's vision successfully transitioned from regional real estate to ensuring National Self-Reliance.
- **Psychological Contract:** Effectively makes employees feel their personal labor is building the infrastructure of their nation.
- **Structural Bottleneck:** While the tall hierarchy ensures stability, it creates a potential bottleneck in decision-making speed.
- **Resource Efficiency Milestone:** By 2026, 60% of production lines feature intelligent automation, drastically reducing waste.

Slide 26: Strategic Recommendations

- **Flatten Tech Divisions:** Reduce layers of hierarchy in fast-moving sectors like Media and FMCG to empower middle management.
- **Green Management:** Accelerate focus on Low-Carbon Materials and renewable energy integration to meet environmental benchmarks.
- **AI Integration:** Invest heavily in AI-driven supply chain analytics for predictive factory maintenance and precise demand forecasting.
- **Bottom-Up Feedback Loop:** Establish formal systems to give shop-floor workers a voice, fostering innovation and reducing communication gaps.

Slide 27: Conclusion & Q&A

- **Thank You for Your Attention!**
- **Are there any questions?**
